

Mathieu Dupont

Founder

Miralupa

Mathieu Dupont has 30 years of experience in systems development and information technology (IT) management.

Prior to founding Miralupa in 2011, he worked as an analyst, systems architect, technology architect and strategic IT management advisor in several SMEs and large companies in the airline, telecommunications and industrial process control sectors. He is the designer of the software and hardware architecture for the augmented reality platform MARGE (Multiuser Augmented Reality Global Environment) and oversees all of Miralupa's research and development activities.
