

Rizwan Younis, PhD, P.Eng.

Technical Director and Research Associate Centre for Advancement of Trenchless Technologies, Department of Civil & Environmental Engineering, University of Waterloo

Dr. Rizwan Younis is the technical director and research associate at the Centre for Advancement of Trenchless Technologies, University of Water for the past seven years. Before getting into academia, Dr. Younis worked in the industry on construction, rehabilitation and remodelling of large scale civil infrastructure systems including highways and water resource development projects. For the past twelve years, he has been working on buried infrastructure asset management including pipelines' condition assessment and rehabilitation using trenchless techniques. He is a member of PEO and serves on AWWA's pipeline condition assessment and rehabilitation committees.
