

*Benoit Garneau has more than 10 years of experience at Énergir, initially as Supervisor of operations, and currently as Advisor, Infrastructure Damage Prevention.*

*In this role, he implements awareness and damage prevention measures, actively participates in various prevention committees with industry partners and offers training in best practices to be put in place near the gas network. His years of working as Supervisor of operations gave him the opportunity to take concrete measures in the field and hone his skills in emergency interventions and infrastructure damage prevention.*

*Mr. Garneau also holds a certificate in educational training and is pursuing research aimed at promoting infrastructure damage prevention.*
