Bruce McTavish has over thirty years of industry-related experience in the horticulture, agriculture, education, and environmental sectors of British Columbia. This has included soil and land capability assessments, environmental assessments, vegetation management, project management, strategic planning, business planning, market assessment and facilitation of industry meetings.

Bruce McTavish has been involved in the assessment of agricultural and financial damage caused by linear developments such as pipelines and highways. He has also carried out technical work in a wide range of agricultural commodities from greenhouses to poultry farms. He has carried out assessments of failed landscapes and represented clients in arbitration and Supreme Court.

For the last two years, Bruce did the restoration work for the FortisBC Lower Mainland System Upgrade.

Most recently, Bruce and his company have been lead consultants for agriculture and forestry on the Trans Mountain Expansion Project. They also provide professional oversight and supervision for the Trans Mountain vegetation management program between Burnaby and Kamloops.
