

# Stan Tumoth

## Damage Prevention Program Manager

### TransCanada

---

Stan is currently employed as Damage Prevention Program Manager at TransCanada and is a member of the Alberta Common Ground Alliance Best Practices Committee. He has 22 years of combined experience in facility & pipeline construction and hydrocarbon production operations. His career has comprised positions in Quality Control, HS&E and oilfield construction management and oversight.

Prior to being employed with TransCanada in 2009, he provided consultation and construction inspection services for greenfield and maintenance projects throughout Western Canada.

Stan is a member of TransCanada's Construction Safety Committee and delivers company ground disturbance training throughout North America. Stan studied English Literature and Environmental Science in post-secondary.
